## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 6-19 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or make obvious a method for forming a ceramic chip with terminal electrodes on outer surface wherein the electrode includes the steps of a final step of baking the electrode after forming a three layer composite wherein the first layer is baked prior the subsequent baking step of the electrode, and a second layer sandwiched between the first and third, contains an additive that forms a porous structure upon the final baking step. The electrode structurally results in a porous layer sandwiched between two layers. While the prior art (i.e. Shibano) discloses a porous electrodes on outer surfaces, it is distinguishable from the present invention in that the electrode tends to be only a single porous layer that is subsequently filled while forming interior wiring.

### ***Response to Arguments***

Because applicant have amended its independent claim to disclose a method and a structure not shown in the prior art, the previous rejection has been withdrawn.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M. Mitchell whose telephone number is (571) 272-1931. The examiner can normally be reached on M-F 10:30-8:00.
